TRAVEL & TOURISM INDUSTRY

Ahhh... maybe you are laughing at us or maybe you have thought about the business recently.

Just answer a SIMPLE question:

How many of your friends, family members, colleagues, neighbours or even YOU have just travelled for the New Year Vacation?

ALL !

Many?

Or at least a few!

Now just IMAGINE, how many people across the world are travelling. Simply consider the approximate bills they are paying and the percentage of their earnings which are being used here.

Isn't it a great choice? Gone are the days when people used to stay at home and enjoying holidays, now they are exploring the world. And there is a tremendous scope in this multibillion dollar industry.

How to enter this industry?

With the growth of the Internet, you no longer need a shop and open an agency, you can do most of the things using your computer or laptop or even a mobile device! There is a great OPPORTUNITY available for you to start your business instantly.

>>[TRAVEL OPPORTUNITY](#)<<

ESHOP

Having an eShop is yet another thing to start this new year. Hundreds of online shops are being opened each month and many of them are succeeding. Although they are easy to deploy in terms of the available software which are economic as well, is a good amount of capital might be needed at the outset (imagine selling 30 items in 50 categories with 10 quantities of each item!).

Look at a huge list of some of the shopping sites which can be an inspiration:: >> [LIST](#)

A solution to this is to start with a niche market. Say for example an online portal for t-shirts or computer and laptop with their accessories . But this again may NOT be a choice for businesses or individuals looking for very less investment.

Yet another WAY OUT is to get associated to major retailers!

Wooaah!

Consider this – You want to have your eShop and sell laptops. You can have a margin of 10-25% in general depending upon the brand as well as product and a few other factors. You have invested in portal, a few employees, the servers, the shipping / courier companies and then the losses which can be invariable in any business!

You end up getting a meagre 5 – 15% margin now (with 15 % in not so “HOT” products). POOR!!

Why don't sell the same laptop with YOUR BRAND!

Check out one of our such stores!

FOREX

Need urgent cash! Forex is a great way to trade your money and get huge returns! You can MULTIPLY your investment and hence multiply your returns! Moreover, investing at a place which is live more than stock market is always beneficial. But beware- high lucrative things are the most risky too!

The foreign exchange market is also known as FX or it is also found to be referred to as the FOREX. Keeping it simple its a kind of currency trading and hence the game is international ☺ You may like to join the forex business with one of the very credible company. [Click here](#)

Trading in forex can be done via many platforms available. We have found a SYSTEM which claims to help you MAXIMIZE profit using their system. But as explained, read their terms and conditions and join only if if you find them suitable. You may check it below and try the TRIAL first:

STOCK MARKET

Featured ad:  >> Launching Soon.

Why to make a company from scratch, do all the hard work and wait patiently for profits when you can own it at ease? Stock trading gives you an opportunity to own a company and the luxury to earn a great amount of money by being flexible. If smart, you can be riding on cash on good times and quit on the bad ones thus making a win-win move!

And then there is not just one company or sector. You can invest and trade (or both) in a diversified manner and *play* with the companies. Many companies do a great profit at particular time (for instance greeting card and gifts making companies during the New Year or Valentine's Day) and if a person bets on the right time in right companies s/he can surely make a killing! (Though there are other factors to consider simultaneously and not just ONE constraint).

Yet again, the chance of earning in stock markets is less and majority of the people who are into it are at a loss! But still there are many who are making a great living by performing proper analysis and trading vigilantly.

Yet again there are systems and *techniques* which as claimed by many businesses are very profitable. One such system claims to help you make 1000 times profit in just 38 trades!! Hard to believe but they have a proof too. You can find it here >> [Click Here](#)

ONLINE / HOME BASED

Home based businesses are catching up and many people are getting into them. Although they seem lucrative, many of them either turn out to be frauds or pay a very less money. Yet if right tools and systems are found, they can turn out to be of a great help for many.

A few of the work from home businesses are taking online surveys, reading emails, watching video content and even clicking on ads! But it takes a lot of hard work to search for such programs and then research for their authenticity. Moreover, joining just one program is not so profitable, hence multiple programs are to be considered.

Here are some sites which claim to have database of authentic and / or high paying home based business. Also some of them teach on *how to* make most out of them:

Work from Home

Love it or hate it, but you cannot ignore it!!

All of us have either joined a work from home or multi level marketing program or have definitely found a friend, family member or relative joining it. *Credible* Multilevel marketing are a fantastic way to make money (The **FIRST WORD** of this sentence is very important).

Yes, there are many multilevel marketing companies and most of them are frauds! Even if they are not, their business model is as most of them are ponzi schemes where the *ONLY* product you will sell is the system (which indeed is not a product but system).

You may like to read and do research on Multi Level Company you are intending to join. There are a few resources for the same:

1. www.Articles2Read.com : They have some good articles on this topic as well as other related (and not related) topics! A huge collection of articles in one place can make you go for it. Although we didn't find too many articles on MLM, but there are articles which are **MORE** important if you looking for MLM.

The articles which are of importance include but not limited to ADVERTISING, MARKETING, SMALL BUSINESS, WORK FROM HOME, TAX, FOREX, SAVINGS, CAREER, PARTNERSHIP, ENTRENEURSHIP and many more. You can check out their site by visiting www.Articles2Read.com

We are impressed by their articles on Multi Tier as well as a few others which are worth reading (and joining!!). There is a huge list of programs worth joining and most of them are FREE. Check out www.Kamaiye.com

The biggest misconception among people related to money is :
:"The more HARD you work, the more you Earn". We at microsoftpay believe different "The smarter you work, the better you earn". And what is the smarter way to earn REALLY BIG BUCKS by just sitting in front of a PC or Laptop and emailing! Or just doing some copy paste works. Or you may get buck reading

something. Or can easily pay off bills by just taking part in online surveys!!”

There are many other resources to earn. Many *systems* claim to give you 1 click software to make *instant money*. Such systems are many a times *scamy* and *spamy* and have to be taken care of. You may try some of the systems as shown below:
